FIRST ROBOTICS

FIRST Robotics

If you're an engineering major who was, or still is, part of the Robotics Competition (FRC), this one-of-a-kind internship opportunity is for you!

FIRST means "For Inspiration and Recognition of Science and Technology" and that's what this exciting internship program is all about. By working together, UTC and *FIRST* are motivating young people to pursue career opportunities in Science, Technology, Engineering and Math (STEM). The UTC *FIRST* internship program will offer select individuals the chance to extend their competition experience with hands-on work at UTC, in one of the following functional areas:

- Acoustics/Avionics
- Aerospace
- Chemical
- Computer/ Software
- Electrical
- Fire Protection
- Industrial
- Manufacturing/ Process/ Quality
- Material Science
- Mechanical
- Systems

Partnering with *FIRST* combines UTC's focus on innovation with its dedication to STEM education. Since 1995, UTC has contributed more than \$3 million to the *FIRST* Robotics Competition in an effort to inspire a new generation of scientists and engineers. We're proud to continue to invest in your potential with an opportunity to further expand your skills, knowledge and imagination as a UTC *FIRST* Robotics intern.

APPLICANT QUALIFIERS

- College Students majoring in Engineering
- Students that were, or are still part of the *FIRST* Robotics Competition

FIRST Robotics Alumni:

Are you interested in potential internships with UTC? Submit your information through the link below. By sharing your information you may receive relevant company information, as well as e-mail notifications when internship opportunities matching your preferences become available.
