

Robotics Team demonstration at Norfolk Farmers Market

The robotics team from Northwestern Region 7 High School (NRG 4055) will demonstrate their Championship winning robot named "Scratch That" at the Norfolk Farmers Market on Saturday, October 4, 2014, from 10 a.m. to 1 p.m. The team will also hold a fundraising tag sale across the street at 35 Maple Avenue. NRG 4055's mission is to inspire students to become involved in science and technology, with a focus on engineering skills, teamwork and leadership training. The team competes in the FIRST (For Inspiration and Recognition of Science and Technology) Robotics Competitions against teams from all over the country and around the

world. It provides an opportunity for students to work closely with engineers and business professionals to get an intense hands-on experience designing, building and competing with a robot. FIRST offers close to \$20 million in scholarships per year through countless universities and colleges. The scholarships are available for study in a variety of majors, not just STEM (science technology engineering and mathematics) subjects. Please come to meet this passionate and dedicated team, mentors and students alike!

The market is located on the Town Hall lawn, 19 Maple Avenue, 1 block north of Route 44 in Norfolk.
